

AMIDA

Augmented Multi-party Interaction with Distance Access

<http://www.amidaproject.org/>

Integrated Project IST-033812

Funded under 6th FWP (Sixth Framework Programme)

Action Line: IST-2005-2.5.7 Multimodal interfaces

Deliverable D6.2: Application Prototypes

Due date: 01/10/2007

Submission date: 09/11/2007

Project start date: 1/10/2006

Duration: 36 months

Lead Contractor: IDIAP

Revision: 1

Project co-funded by the European Commission in the 6th Framework Programme (2002-2006)

Dissemination Level

PU	Public	✓
PP	Restricted to other programme participants (including the Commission Services)	
RE	Restricted to a group specified by the consortium (including the Commission Services)	
CO	Confidential, only for members of the consortium (including the Commission Services)	

D6.2: Application Prototypes

1 Description of the DVD comprising D6.2

AMIDA deliverable D6.2 is a DVD containing a number of application prototypes arising out of the AMIDA project. This document is a cover sheet for the DVD.

The following prototypes are present on the DVD:

Automated Talk Webcasting and Slide Retrieval

Automatic Video Editing

Dialogue Act Timeline Comparison

Dominance Monitor

Face Analysis

Remote Meeting Interest Notification

Meeting Browser with Extractive Summaries

Mobile Application

Segmentation Viewer

SuVi - Summary Visualisation

Visual Focus of Attention

The demos run directly on a Windows PC. The DVD includes versions of the Java Virtual Machine, Java Media Framework, and FOBS in order to minimize installation requirements on the machine itself. The DVD contains a README.html file that explains how to access the demonstrations. Each demonstration is explained in an html page.

The DVD is intended for use by project staff in demonstrating AMIDA results for the purposes of technology transfer. Since AMIDA builds on the AMI project, staff may also find the previous demonstration DVD, AMI deliverable D6.5, useful. This new DVD does not duplicate any of the material on that DVD, although in some cases it does contain new demonstrations based on the same underlying technology.
