

MOBIO Database

Phase I Progress

Christopher McCool
January 8-9, 2009
Martigny, Idiap Research Institute

Presentation Outline

- Overview and Progress to Date
- Where to from here?

Overview and Progress to Date

Overview

- Recordings began at the end of August
 - All sites have received their mobile device
 - There were minor delays (illness, conferences, recent employment of staff, etc.)
 - The initial recording schedule was reworked to take this into account

Progress to Date

- Currently we have

- The enrolment data from every site (mobile and laptop data)
- The first test session from every site has been uploaded
- The second test session has been uploaded from almost every site (LIA is the only exception)
- The third test session has been partially captured

Issues and Concerns

• Data Collection

- The length of time for each recording has been highlighted as a concern by a few participants
- Some people speak very softly (barely audible)
- Audio noise is definitely present in the recordings
- The lighting and pose variation can be quite significant (sometimes very bright and other times very dark)

Plans for the rest of Phase I

- Current Plans for Phase I
 - Nothing will change for Phase I
 - But we will be trying to get feedback from people
 - From the people collecting the database
 - From the participants

Feedback

- Feedback from people collecting the database

- Why?

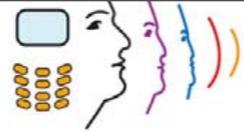

- To see what could be improved or changed for Phase II

- How?

- One thought is to put together a satellite meeting with the next MOBIO meeting
- Purely to discuss the database, problems for each site, problems with collecting data, etc.

Feedback

- Feedback from people participating in the database
 - Why?
 - To try and ensure we don't have users dropping because they are too uncomfortable with the current process
 - Also to ensure the data collection doesn't take too long (longer than 20 minutes would be a concern)
 - How?
 - A questionnaire will be emailed to each participant (since we have their email addresses)
 - Any comments on this questionnaire are very welcome (it will be available via the mobio website)

Survey MOBIO Recordings

The following is a questionnaire for the **MOBIO database participants**. We are very appreciative of the time and effort that every participant has made towards these database recordings. As such, we would like to gain some feedback from every participant to improve and simplify the recordings.

All responses to this questionnaire are anonymous. It is anticipated that it should take at most 10 minutes to complete this questionnaire.

1. How long does it take you to finish all of the questions on the mobile?

- Less than 10 minutes
- 10 minutes
- 15 minutes
- 20 minutes
- More than 20 minutes
- No opinion

2. Would you feel comfortable doing these recordings outside?

- Yes
- Maybe
- No
- No opinion

3. Do you feel that the random questions are appropriate?

- Yes
- Most of them are
- Some of them are
- Most of them are not
- No
- No opinion

4. If not, please comment on what kind of random questions you would like to be asked

.....
.....

5. What was the most difficult part of the recordings?

.....
.....

6. If there is one thing about the MOBIO recordings you would change what would it be?

.....
.....

7. Any other comments or suggestions?

.....
.....
